[Service Development and Screening](#)

This leaflet is used to support the Northern Ireland breast screening programme and explains the additional tests that may be offered at a breast assessment clinic following a mammogram that has shown a possible abnormality.

The translations are of the 2014 leaflet.

**Please note that, under current COVID restrictions, unfortunately it may not always be possible to allow someone else to accompany you at this appointment for the entire duration of it.** Clients are asked to attend appointments on their own where possible. If someone is attending with you as support, they are encouraged to remain in their vehicle or in the vicinity, and they can be called into the building for you if needed. In exceptional circumstances it may be possible to have a carer or comforter present, but please contact your screening unit before your appointment to discuss this (contact details are on page 5 of the leaflet).

## Details

Format

6 page A5 leaflet

Target group

Women aged 50-70 years
