Health and Social Wellbeing Improvement

The F.A.S.T materials (poster/leaflet/wallet card) convey the signs and symptoms of stroke, and the call to action, that it's a medical emergency to call 999 immediately if you see any one of these signs. A fast response to the signs and symptoms of stroke can reduce the long term health consequences such as disability and death. Attached below are the public information leaflets (male and female version), posters and wallet card available as part of the campaign.

Details

Format

Various.

Target group

General public.
