Notes:

** From September 2019 the HPV vaccination programme was extended to males aged 12-13 years old. This is the second year that HPV vaccination coverage in Northern Ireland has been presented for both males and females.

*NI uptake of year 9 dose 2 has been impacted by a delay in delivery of dose 1 HPV in SEHSCT due to operational reasons.

Year 9 dose 1 delivery in this Trust was delayed until January 2023 meaning dose 2 was due September 2023,

however the one dose programme commenced September 2023 therefore at this time these children will be considered to have completed the course.
