SOURCE: Northern Ireland Statistics and Research Agency, Mid Year Estimates 2011

Population estimates are based on Census 2001. Estimates based on 2011 Census are not yet available.

FOOTNOTES: Population estimates are generally rounded because population counts from the Census and subsequent updates involving births, deaths and migration cannot be precise. Totals of rows/columns may not add up due to rounding.

All figures are home population figures

FOOTNOTES: The Stillbirth (Definition) Act 1992 redefined a stillbirth, from 1 October 1992, as a child which had issued forth from its mother after the 24th week of pregnancy and which did not breathe or show any other sign of life. Prior to 1 October 1992 the statistics related to events occurring after the 28th week of pregnancy.

Figures do not include births to women living outside Northern Ireland
 Birth rate is calculated using total population figure

FOOTNOTES: Age-specific fertility rate is the number of live births occurring to a particular woman of a particular age or age group per year, normally expressed per 1,000 women
 Total Period Fertility Rate (TPFR) is the average number of children that would be born to a cohort of women who experienced throughout their childbearing years the fertility rates of the calendar year in question.

FOOTNOTES: Age-specific fertility rate is the number of live births occurring to a particular woman of a particular age or age group per year, normally expressed per 1,000 women
Total Period Fertility Rate (TPFR) is the average number of children that would be born to a cohort of women who experienced throughout their childbearing years the fertility rates of the calendar year in question.

FOOTNOTE: Percentages may not total 100 due to rounding
 The Stillbirth (Definition) Act 1992 redefined a stillbirth, from 1 October 1992, as a child which had issued forth from its mother after the 24th week of pregnancy and which did not breathe or show any other sign of life. Prior to 1 October 1992 the statistics related to events occurring after the 28th week of pregnancy.

FOOTNOTE: ICD = International Classification of Diseases (10th Revision)

In the UK, when reporting deaths from suicide, it is conventional to include cases where the cause of death is classified as either 'Intentional self-harm' or 'Event of undetermined intent'. The latter are included in Other causes above consistently with previous reports. In 2011 there were 43 male and 26 female such deaths recorded. If these are included the total suicide and undetermined intents are 216 male and 73 females respectively. More detailed breakdowns can be obtained from <http://www.nisra.gov.uk/demography/default.asp14.htm>

FOOTNOTE: ICD = International Classification of Diseases (10th Revision)
 Potential Years of Life Lost (PYLL) is a measure of premature death, measured as the number of years of life 'lost' from a death when a person dies before the age of 75. A death at age 25, for example, has lost 50 potential years of life.

Table 10d

SOURCE: Child Health Systems (Cover/Korner)

FOOTNOTES: Uptake rates for:
 Diphtheria, Polio, Tetanus, Whooping Cough and Hib refer to children who have received 3 doses (completed) before their first birthday.
 MenC and PCV refer to children who have received 2 doses (completed) before their first birthday.
 MMR1 by age 2 refer to children who received the first dose on or after their first birthday and before their second birthday
 MMR1 by age 5 refer to children who received the first dose on or after their first birthday and before their fifth birthday
 MMR2 by age 5 refer to children who received 2 doses on or after their first birthday and before their fifth birthday
 Pre school booster refer to children who received their vaccine by age 5
 HPV refer to girls in form 9 aged 12-13yrs who have received their 3rd dose (School yr)
The format of this table has been changed for 2011 Core Tables. As a result, earlier years are not available.
